

Top 10 Reasons Schools Should Not Dissect Frogs

1. Frogs are the most rapidly disappearing group of animals on the planet.
2. Most frogs being dissected are taken out of the wild.
3. Farm-raised frogs have high rates of infectious diseases.
4. Excellent digital dissection software exists.
5. Few students have any need to know what the inside of a frog looks like.
6. If a student plans to be a doctor they can dissect cadavers in med school
7. Unnecessarily killing an animal is unethical and teaches students that animals are disposable.
8. Students' time would be better spent learning about the threats frogs face and ways students can help protect amphibian populations.
9. Students should not be forced to be unwitting accomplices in the extinction of frog species.
10. Abandoning your school's dissection program sends a strong signal that you support worldwide amphibian conservation efforts.

Please help us get frog dissections out of every public school in the USA by 2014: ask your teachers to switch to virtual software dissections!

FROG DISSECTIONS ARE UNETHICAL AND UNNECESSARY.
