

# SAVE THE FROGS!

Save The Frogs Day  
April 28th Every Year

## Frogs are disappearing!

**2,000** amphibian species are threatened with extinction and may not survive the 21st century.

**200** amphibian species have already gone extinct in recent decades.  
This is not normal!

## Threats to Frogs

Habitat Destruction

Pollution & Pesticides

Global Warming

Infectious Diseases  
(spread by humans!)

Over-harvesting for the pet & food trades

Invasive Species

## Frogs are important!

Frogs are an integral part of the food web

Frogs are bioindicators

Frogs eat ticks, mosquitoes and other disease vectors

Frogs have an inherent right to exist

## Frogs are cool!

## How to Help

### Reduce, Re-use, Recycle

**Use** rechargeable batteries

**Vote** for the environment

**Become** a herpetologist

**Go** vegetarian

**Eat** locally grown, organic food

**Donate** to SAVE THE FROGS!

**Wear a** SAVE THE FROGS! t-shirt

**Spread the word:** use email, your website, etc.

**Don't** use pesticides

**Don't** eat frog legs

**Don't** purchase wild-caught amphibians as pets

**Slow down** driving on wet nights

**Do not** stock non-native fish in your pond or stream

**Do not** purchase bottled water

**Turn off** the tap

**Conserve** resources
